# FIBERGLASS DOORS

# FIBERGLASS DOORS

Nan Ya fiberglass doors and composite mouldings combine modern technology with functionality and style. Nan Ya Plastics Corporation is the largest company in the Formosa Plastics Group, a world leader in plastics innovation and manufacturing. Since 2005, Nan Ya has revolutionized the door industry worldwide with water resistant technology, composite door frame components, and the development of the highest quality fiberglass doors available today.

National distribution in Canada is provided by Richersons Enterprises in Langley, BC; and Richmond Hill, ON and West Four Group of Companies Inc., with centers in Calgary, AB; Saskatoon, SK; Winnipeg, MB. Combined space of over 180,000 sq. ft. coast to coast allows us to provide the largest assortment of in-stock products, partnered with exceptional service to meet the needs of Canadian door manufacturers.

## BUILT FOR THE

# CANADIAN CLIMATE

---

**Unsurpassed vertical integration and ISO 9001 / ISO 14000 monitored manufacturing processes help support the R&D team.**

- **High impact compression moulded fiberglass skins** are “weatherproof” and will not delaminate, corrode, mold or mildew. Nan Ya fiberglass doors also do not dent, rust, warp, crack, split, splinter, or rot and are very easy to keep clean.
- **Waterproof composite stiles and rails** are sealed and beautifully finished to protect all edges of the door from moisture penetration which could harm the inner insulation. The composite material will not delaminate or splinter and boasts twice the screw-holding capacity of typical wood-edge doors. The top and bottom rails are also composite components that prevent water seepage, are easy to trim and pre-machined to accommodate the bottom weather sweep. This patented innovation protects every Designer Arch fiberglass door from moisture infiltration.
- **Full length lock block** and more internal structure than any door of its kind in North America. This structural reinforcement also ensures added security against forced entry and provides incomparable stability.
- **Guaranteed.** Nan Ya backs every door with a 25 year limited manufacturer's warranty. Not only do they stand behind any manufacturing defects, they also warrant against 'thermal bow'.

# MODERN TEAK

## TEXTURED FIBERGLASS

Long praised for its natural beauty and endurance to the elements, teak has become one of the most valued wood species on the planet. This modern fiberglass teak design is perfect for contemporary or traditional design.

Though the teak series is beautiful with any hardware combination, European styling is achieved when paired with an architectural door pull and deadbolt combination.

When ordered, these slabs arrive as a light almond colour to accept paint or gel stain.

TG71  
31 3/4, 33 3/4, 35 3/4 X 79, 83

# TEAK FLUSH

## TEXTURED FIBERGLASS

As a continuation of our popular Teak design, the **Teak Flush** fiberglass door adds a contemporary but classic touch to any entranceway.

Achieve a fresh and distinctive look by adding a few simple grooved lines or stainless-steel decorative elements.

## NEULITE FLUSH GLAZED

The insulating effect of your doors has a direct impact on how your rooms feel. Our glazing options provide not only a beautiful entry, but also a reliable barrier against the heat and damaging rays of the hot sun. Each double pane Low-E glass option provides Argon gas filled insulation to prevent the transfer of heat, keeping heat in during the winter and out during the summer. Available glass options are designed to reflect ultraviolet light, not only keeping interiors cooler or warmer, but also protecting interior furnishings from fading. Warm edge spacers help to keep the panes at the correct distance apart while reducing heat flow and preventing condensation.

### HYDROSHIELD PROTECTION

Crafted with Hydroshield Technology, every Richersons Open & Beaded door contains the best combination of performance, durability, security and appearance.

Richersons Open & Beaded doors are precision engineered to provide protection against water infiltration. The specially engineered composite material will never absorb water, eliminating the problems commonly associated with wood and metal doors.

## SIMULATED DIVIDED LITES (SDL)

Simulated divided lites give you the classic look and feel of a true divided lite door. 100% composite SDL bars are fixed directly to the glass and can be ordered with or without grilles between the glass. 1-1/4" and 3-1/2" SDL bars are available for the 1" glaze option in smooth finishes to match the door's finish.

# COMPOSITE

## JAMBS & ACCESSORIES

Maintenance-free smooth white or woodgrain composite offers all the strength and convenience of wood with enhanced properties, providing a moisture and damage resistant product suited for the Canadian climate.

Though machined with the same process as traditional wood door frames, solid composite provides twice the holding power of wood. While similar door frames may crack or bow under the intense cycle of the Canadian climate, Nan Ya's composite door frames have proven to stand proud against the test of time.

Research shows that in most forced entry situations, door system failure lies within the frame, not the door slab. Our composite frame will not splinter or crack, providing a virtually indestructible product and reducing forced entry concerns.

Nan Ya's premium composite frames – an innovative alternative to traditional wood frame construction.

- Textured woodgrain or pre-pigmented smooth white frame components are a blend of PVC and wood fiber composite substrate.
- Solid composite provides twice the holding power of wood.
- Will not discolour, absorb moisture, splinter, or rot.
- Textured woodgrain composite components have a realistic rich appearance requiring paint or stain.
- Jamb can be painted or stained to your requirements.

## OPEN & BEADED DESIGNS

vs STANDARD PANEL DESIGN

### FLUSH GLAZED DESIGNS

#### 1/2, 3/4, Narrow & Full Lite

Open and beaded fiberglass doors are designed to incorporate glass directly into the slab providing sleek lines to give the perception of a more enhanced viewing area. The pre-pigmented smooth white or oak woodgrain slab is consistent from door edge to glass. This product line can also be manufactured with glass installed during the assembly process.
